

NASA Cleanup Progress at SSFL

Soil Chemical Characterization 2011-2014

- Draft Data Summary Report reviewed, under revision by NASA
- 2,800+ chemical soil samples, 160+ soil vapor samples since 2011
- Soils characterized to DTSC-NASA AOC Lookup Table values
- Soil Treatability Study Report due in mid-2016

Groundwater Source Area Investigations 2014-2016

- Four major NASA groundwater contaminant source areas
- NASA work plans approved, final aquifer tests in progress
- Borings/wells, geophysics, soil vapor samples, fault studies, pump tests
- Results to be reported in 2016

NASA Demolition Program 2015 - 2018

- ELV Area complete, second phase in Spring 2016

CEQA Analysis and NASA Cleanup Decision Documents 2016
