### **Draft Reports**

#### **Resource Conservation and Recovery Act Facility Investigation**

#### **The Boeing Company**

#### **Santa Susana Field Laboratory**

#### **Ventura County, California**

The Boeing Company has submitted reports to the Department of Toxic Substances Control (DTSC) that present the draft findings and recommendations for a portion of the Resource Conservation and Recovery Act (RCRA) Facility Investigation (RFI) at the Santa Susana Field Laboratory.

The reports present the results of RFI work and recommendations for cleanup evaluation under a Corrective Measures Study (CMS) and No Further Action (NFA) for all media (soil and groundwater) within a portion of SSFL designated as Subarea 5/9 South.

Subarea 5/9 South includes four sites (Systems Test Laboratory IV, Area III Sewage Treatment Plant, Compound A Facility, and Environmental Effects Laboratory). Additionally, the reports cover the areas in Subarea 5/9 South not associated with an RFI site.

DTSC is reviewing the reports to evaluate whether the data and analysis are adequate for cleanup decisions. DTSC anticipates completing review of the documents by August 30, 2015. During this period, public input is welcome and will be considered. Please email your input to either contact listed below.

### **The Executive Summary for the draft report for the overall subarea is located at:**
