ADDENDUM TO THE MASTER RCRA FACILITY INVESTIGATION DATA GAP WORK PLAN, SANTA SUSANA FIELD LABORATORY, VENTURA COUNTY, CALIFORNIA, BOEING RFI SUBAREA 10, SOUTHERN BUFFER ZONE

Dear Mr. Dassler;

The Department of Toxic Substances Control (DTSC) has completed review of the "Addendum to Master RCRA Facility Investigation Data Gap Work Plan, Santa Susana Field Laboratory, Ventura County, California, Boeing RFI Subarea 10".

The work plan addendum was prepared by CH2M Hill, and submitted to DTSC on August 16, 2013.

The work plan addendum was developed to:

- Summarize the investigation areas that have been identified in Subarea 10 (the Southern Buffer Zone);
- Document the comprehensive data quality objectives evaluation for the Southern Buffer Zone;
- Respond to DTSC's comments on the Draft Group 10 RFI Report that pertain to the Southern Buffer Zone; and
- Present the proposed data gap work plan for the Southern Buffer Zone.

The work plan addendum adequately presents the current iteration of data gap evaluation and planning, and adequately presents the approach for conducting the proposed data gap sampling. DTSC approves the work plan for implementation.

Mr. Dave Dassler
