RECEIPT OF CLOSURE PLAN HAZARDOUS WASTE MANAGEMENT FACILITY:
BUILDINGS T029 AND T133, EPA ID NO CAD000629972, SANTA SUSANA FIELD
LABORATORY (SSFL)

Dear Sirs:

The Department of Toxic Substances Control (DTSC) received and is reviewing the above referenced Closure Plan. The Closure Plan addresses the hazardous waste management requirements for closure of Buildings T029 and T133 (referenced as Building 4029 and 4133 in some historical reports). The Department of Energy's (DOE) obligations with respect to the cleanup of the soils at SSFL, including soils around this facility, shall require compliance with and fulfillment of the obligations required by the 2010 Administrative Order on Consent for Remedial Action, HSA-CO 10/11-037.

Once DTSC completes our Closure Plan review, DTSC will either request additional modifications or release the document for public review and comment in accordance with California Code of Regulations, Title 22, Section 66264.112(c).

Messrs. Jones and Frazee
August 31, 2015
Page 2 of 2

Regardless of when both DTSC's review and the public comment period are completed, DTSC will not approve the Closure Plan for implementation until both DTSC's Environmental Impact Report (EIR), as well as DOE's Environmental Impact Statement (EIS) are certified, currently anticipated in late 2016. DTSC appreciates DOE's proactive role in preparing this closure plan so that multiple SSFL decision documents can be finalized in an expedited manner once the EIR and EIS for SSFL are completed.

If you have any questions regarding this letter, please contact me via email at Mark.Malinowski@dtsc.ca.gov or at (916)255-3717 or Mr. Matt Wetter via email at Matthew.Wetter@dtsc.ca.gov or at (916) 255-3464.

Sincerely,

Mark Malinowski, Chief
Santa Susana Field Laboratory Support and Northern California Schools Branch
Department of Toxic Substances Control
